

Range of bifurcated axial flow fans with motor isolated from the air stream making this range suitable for continuous operation up to 150°C and a short time up to 150°C and 200°C for temporary running. The casings are manufactured from high grade rolled sheet steel protected against corrosion by black epoxy paint finish. All models incorporate one piece die-cast aluminium impellers. Available, depending upon the model, with singlephase or three phase motors in 2, 4 or 6 poles.

Motors

All motors are direct drive, IP55, class F insulation.

Electrical supply:

- Single phase motor 230V-50Hz
- Three phase motors 400V-50Hz

On request

Casing manufactured from stainless sheet steel or formed from rolled sheet steel with a corrosion resistant hot dipped galvanized finish. Motor with PTC thermal protector.

Specific applications

TECHNICAL CHARACTERISTICS

Before installation check that product electrical characteristics listed on the data plate label (voltage, power, frequency, etc.) match those of the intended electrical supply.

Model	Speed (r.p.m.)	Motor power 400V (kW)	Maximum absorbed current 400V (A)	Airflow (m³/h)	Sound pressure level at 3 m (dB(A))	Weight (Kg)
TEB/2-400 N	2800	1,1	2,5 (230V)	6.150	83	43
TET/2-400 N	2800	1,1	2,5	6.150	83	42

PERFORMANCE CURVES

- Fan ducted on both inlet and outlet sides.
- q_v : Air volume in m^3/h .
- p_{sf} : Static pressure in Pa.
- Dry air at 20°C and 760 mmHg.
- Performance data in accordance with ISO 5801 and AMCA 210-99 Standards.
